Tom Miller
Marty Shifflett
David Harris
Clairen Sipe
Richard Carey

ABSENT
S. Sigafoose

Alan Todd, professional engineer, explained the benefits of purchasing and installing a peak electric generator. If Elkton generated electric for 1 hour of peak demand each month, the capacity would be reduced by approximately 800 kw. For that amount, Virginia Power would pay the Town $17.00 per kw, which would total approximately $165,000.00 annually. The average payback time for a small generator is 2.2 years. An installed, ready-to-go generator would cost approximately $323,000.00

Marty Shifflett

Four new employees. Equipment serviced. New clutch installed on chipper by Josh Turner. A savings of $3,000.00 for the Town. Josh is a certified diesel mechanic. The old Community Center and Shop have been cleaned up. Finishing Curtis Lawson's sewer line and Dale Turner's right-of-way. Mr. Shifflett is very satisfied with the rate at which projects are being completed. Vice Mayor Dearing stated only Timmy Turner was hired. The others were brought in under an emergency clause, awaiting official hiring by Council at the Council meeting. This is a highly qualified group of men who will drastically reduce work that the Town will have to sub-contract.

- Equipment needs were discussed.
    1. Derrick - $30,000.00 from HEC fund
    2. Backhoe - $47,000.00 to $50,000.00
    3. Leak Detector

* List of 10 projects
* Fire hydrant testing
* T21
* Town siren
* Connect Life Well to Town system

Public Safety

- $1,000.00 for K-9 training plus $700.00 travel money.

Other

- Clerical support for Director of Public Works

As there was no further business, the meeting was adjourned.

Mayor: _____
Wayne E. Printz

Recorder: _____
Richard D. Carey, Clerk
